

NATHANIEL JOHNSON

ICT & Automotive Technology Professional | Python Developer | Network Technician | Auto Mechanic & Electrician

Liberia | nathanbenadict2021@gmail.com | LinkedIn: linkedin.com/in/nathaniel-johnson-2b33953b4 | GitHub: github.com/nathanbenadict2021-coder

PROFESSIONAL SUMMARY

I am a self-taught technology professional who combines more than 10 years of hands-on experience in automotive mechanics and electrical systems with a growing career in software development, networking, and ICT. I enjoy solving practical problems, learning new technologies independently, and turning ideas into useful applications. My current technical work includes Python, Flask, PyQt6, SQLite, HTML/CSS, computer networking, Linux, and automotive diagnostics. I also hold a CCNA certification from Cisco Networking Academy.

CORE SKILLS

Information Technology	Computer troubleshooting; Windows 10/11; Linux/Kali Linux; TCP/IP; network configuration; Wi-Fi/router configuration; Cisco networking; technical support
Programming	Python; Flask; PyQt6; SQLite/SQLite3; HTML5; CSS3; JavaScript fundamentals; Git/GitHub; VS Code; OOP; REST API fundamentals
Automotive	Automotive diagnostics; vehicle electrical systems; engine troubleshooting; wiring; preventive maintenance; electrical fault finding; OBD-II diagnostics; sensors
Professional	Problem solving; critical thinking; troubleshooting; customer service; technical communication; independent learning; adaptability; project development

PROFESSIONAL EXPERIENCE

Self-Employed Auto Mechanic & Electrician — Master Tech Solutions, Liberia | 2017 – Present

- Diagnose and repair automotive mechanical and electrical problems.
- Troubleshoot vehicle electrical systems, wiring, sensors, and components.
- Perform routine vehicle maintenance and repairs.
- Operate and manage an independent technical service business and communicate directly with customers.
- Apply electrical and electronic principles to automotive troubleshooting and fault finding.
- Continue expanding into computer-based automotive diagnostics and OBD-II technology.

SOFTWARE DEVELOPMENT PROJECTS

OBD-II Automotive Diagnostic Scanner — Python | PyQt6 | SQLite | OBD-II

- Developing a desktop automotive diagnostic application for communication with ELM-based OBD-II adapters.
- Includes DTC scanning, live vehicle data monitoring, SQLite scan history, and multithreaded diagnostic operations.
- Built with a modular architecture and PyQt6 graphical interface.

Personal Portfolio Website — Python | Flask | HTML | CSS | JavaScript

- Developed a responsive professional portfolio website to showcase technical skills, projects, experience, and professional information.
- Implemented Flask backend, multiple pages, navigation, active-page indicators, resume and project sections, and contact functionality.

Python Desktop Applications — Python | PyQt6 | SQLite

- Developing practical desktop applications to strengthen GUI development, database integration, application logic, and user interaction skills.

NETWORKING TRAINING & CERTIFICATION

Cisco Networking Academy — CCNA

Training includes network fundamentals, IPv4/IPv6, subnetting, Ethernet, switching, routing, VLANs, DHCP, Cisco IOS, network troubleshooting, and Cisco Packet Tracer.

EDUCATION & TRAINING

Cisco Networking Academy — CCNA Certification

Independent / Self-Directed Technical Education — Python programming, web development, computer networking, Linux, databases, automotive diagnostics, and AI/ML fundamentals.

SELECTED TECHNICAL PROJECTS

- OBD-II Automotive Diagnostic Scanner
- Flask Personal Portfolio Website
- Python/PyQt6 Desktop Applications
- SQLite Database Applications
- Cisco Packet Tracer Networking Labs
- Automotive Electrical Diagnostic Projects

CAREER INTERESTS

Python Developer • Junior Software Developer • Web Developer • Network Technician • IT Support Specialist • Technical Support Specialist • Network Support • Automotive Diagnostic Technician • Automotive Technology • IoT & Embedded Technology

LANGUAGES

English — Professional Working Proficiency
